21 marks

2017-2025

Instructions

- Answer each question in the space provided.
- Show all your working and follow the rounding instructions.
- Diagrams are not accurately drawn unless stated otherwise.
- Use a calculator except for pages marked NON-CALCULATOR.

Using this booklet

Table questions are arranged by exam series, followed by any chart or histogram extensions. Each page gives its original paper reference and question number. The question numbers within the extracted artwork are the original exam numbers.

Only the specified question parts are included. Shared questions appear in both tier booklets so that each can be used independently. Original question numbers and part labels are retained.

This is an independently compiled practice resource, not an official Pearson examination paper. The source collection covers standard UK June and November papers from 2017-2025. No solutions are included.

Question index

Higher Tier | 6 questions | 21 marks

Practice	Exam series	Paper	Original question	Marks	Page
01	November 2017	1MA1/1H	Q5	4	3
02	November 2019	1MA1/3H	Q4	3	4
03	June 2022	1MA1/1H	Q8	3	5
04	November 2023	1MA1/3H	Q3(a)	3	6
05	November 2018	1MA1/3H	Q4(b)	4	7
06	November 2020	1MA1/3H	Q17	4	8

The original exam numbering is retained in each question.

Paper 1 questions are marked NON-CALCULATOR on their pages.

Chart / histogram extensions: practice 5, 6.

5 The table shows information about the weekly earnings of 20 people who work in a shop.

Weekly earnings (£ x)	Frequency
$150 < x \leq 250$	1
$250 < x \leq 350$	11
$350 < x \leq 450$	5
$450 < x \leq 550$	0
$550 < x \leq 650$	3

(a) Work out an estimate for the mean of the weekly earnings.

£.....
(3)

Nadiya says,
“The mean may **not** be the best average to use to represent this information.”

(b) Do you agree with Nadiya?
You must justify your answer.

.....

(Total for Question 5 is 4 marks)

Time (t seconds)	Frequency
$5 < t \leq 10$	1
$10 < t \leq 15$	2
$15 < t \leq 20$	7
$20 < t \leq 25$	8

Work out an estimate for the mean time.
Give your answer correct to 3 significant figures.

..... seconds

(Total for Question 4 is 3 marks)

Additional working space

8 The table shows the amount of snow, in cm, that fell each day for 30 days.

Amount of snow (s cm)	Frequency
$0 \leq s < 10$	8
$10 \leq s < 20$	10
$20 \leq s < 30$	7
$30 \leq s < 40$	2
$40 \leq s < 50$	3

Work out an estimate for the mean amount of snow per day.

..... cm

(Total for Question 8 is 3 marks)

- 3 Seija works at a weather station.
The table gives information about the temperature, T °C, at midday for each of 50 cities in the UK on Tuesday.

Temperature (T °C)	Frequency
$10 < T \leq 15$	2
$15 < T \leq 20$	8
$20 < T \leq 25$	13
$25 < T \leq 30$	21
$30 < T \leq 35$	6

- (a) Calculate an estimate for the mean temperature.

..... °C

- 4 Fran asks each of 40 students how many books they bought last year.

The chart below shows information about the number of books bought by each of the 40 students.

- (b) Show that an estimate for the mean number of books bought is 9.5
You must show all your working.

(4)

- 17 The histogram gives information about the distances 80 competitors jumped in a long jump competition.

Calculate an estimate for the mean distance.

..... m

(Total for Question 17 is 4 marks)
