2017-2025

Instructions

- Answer each question in the space provided.
- Show all your working and follow the rounding instructions.
- Diagrams are not accurately drawn unless stated otherwise.
- Use a calculator except for pages marked NON-CALCULATOR.

Using this booklet

Table questions are arranged by exam series, followed by any chart or histogram extensions. Each page gives its original paper reference and question number. The question numbers within the extracted artwork are the original exam numbers.

Only the specified question parts are included. Shared questions appear in both tier booklets so that each can be used independently. Original question numbers and part labels are retained.

This is an independently compiled practice resource, not an official Pearson examination paper. The source collection covers standard UK June and November papers from 2017-2025. No solutions are included.

Question index

Higher Tier | 6 questions | 9 marks

Practice	Exam series	Paper	Original question	Marks	Page
01	June 2017	1MA1/3H	Q3(a)	1	3
02	November 2017	1MA1/3H	Q1(a)	1	4
03	November 2018	1MA1/3H	Q17(b)	2	5
04	June 2019	1MA1/3H	Q3(a)	1	6
05	November 2023	1MA1/3H	Q3(b)	1	7
06	November 2023	1MA1/2H	Q15(c)	3	8

The original exam numbering is retained in each question.

Paper 1 questions are marked NON-CALCULATOR on their pages.

Chart / histogram extensions: practice 6.

3 The table shows some information about the dress sizes of 25 women.

Dress size	Number of women
8	2
10	9
12	8
14	6

(a) Find the median dress size.

(1)

Additional working space

Height (h cm)	Frequency
$130 < h \leq 140$	4
$140 < h \leq 150$	11
$150 < h \leq 160$	24
$160 < h \leq 170$	22
$170 < h \leq 180$	19

(a) Find the class interval that contains the median.

(1)

Additional working space

Distance (d miles)	Frequency
$0 < d \leq 20$	120
$20 < d \leq 50$	90
$50 < d \leq 80$	120
$80 < d \leq 150$	140
$150 < d \leq 200$	100

..... miles
(2)

Height (h cm)	Frequency
$10 < h \leq 20$	7
$20 < h \leq 30$	13
$30 < h \leq 40$	14
$40 < h \leq 50$	12
$50 < h \leq 60$	16
$60 < h \leq 70$	18

- (a) Find the class interval that contains the median.

(1)

Additional working space

- 3 Seija works at a weather station.
The table gives information about the temperature, T °C, at midday for each of 50 cities in the UK on Tuesday.

Temperature (T °C)	Frequency
$10 < T \leq 15$	2
$15 < T \leq 20$	8
$20 < T \leq 25$	13
$25 < T \leq 30$	21
$30 < T \leq 35$	6

Seija says,

“The median temperature is 22.5 °C because 22.5 is the middle number in the middle group.”

(b) Is Seija correct?
Give a reason for your answer.

(1)

Additional working space

The histogram below gives information about the times taken by 43 students to run a different race.

- (c) Work out an estimate for the median of the times taken by these 43 students to run the race.

..... seconds
(3)
