

SOHCAHTOA practice

Six questions, increasing in difficulty | Suggested time: 35 minutes | Total: 21 marks

Name: _____ Date: _____

Use a scientific calculator in degree mode. Show your working and keep full calculator values until the final answer. All diagrams are not drawn to scale.

Question 1

[2 marks]

Calculate the length **x**.

Give your answer in centimetres.

Answer _____ cm

Question 2

[2 marks]

Calculate the length **y**.

Give your answer correct to

1 decimal place.

Answer _____ cm

Continue to show your working. All diagrams are not drawn to scale.

Question 3

[3 marks]

A straight ramp rises **1.8 m** vertically and makes an angle of **12°** with horizontal ground. Calculate the length **L** of the ramp. Give your answer in metres, correct to **1 decimal place**.

Answer _____ m

Question 4

[3 marks]

Calculate the angle **θ** .
Give your answer correct to **1 decimal place**.

$\theta =$ _____ $^\circ$

Question 5

[5 marks]

Triangle **ABC** is isosceles, with **AB = AC**.

BC = 12 cm and angle **ABC = 48°**.

Calculate the area of triangle ABC. Give your answer in cm^2 , correct to **1 decimal place**.

Show all your working.

Area = _____ cm^2

Question 6

[6 marks]

A vertical tower **TC** stands on horizontal ground. Points **A**, **B** and **C** lie on a straight line, with **B** between **A** and **C**.

AC = 15 m, angle **TAC = 35°** and angle **TBC = 55°** .

Calculate the distance **AB**. Give your answer in metres, correct to **1 decimal place**.

Show all your working.

AB = _____ m
